

OnCore, your premier medical contract manufacturing partner

OnCore Manufacturing Services is a premier supplier of printed circuit board and final product assembly to the Medical and Life Sciences Industries. Our facilities fully support these industries in a true Lean Manufacturing Environment. A partial list of OnCore's capabilities and certifications are listed below.

- FDA Registered Facilities
- Class I, II, and III Manufacturing
- ISO 85:2003 Certification
- ISO 9001:2000 Certification
- QSR Part 820 Trained and Compliant
- IQ, OQ, PQ Validation Compliant
- Lot and Component Traceability
- Computerized DFX Tools
- NPI services
- Complete testing services, ICT, FCT and system Level
- Closed loop IT capabilities
- Manufacturing Execution System (MES)
- Business Process Mapping (BPM)
- Integrated Quality System (20/20)
- Materials Management System (MMS)

OnCore Electronics Contract Manufacturing

OnCore applies large company technical depth and manufacturing with small company flexibility to all your critical product manufacturing needs.

- Full process validation in accordance with the FDA QSR
- Automated design for manufacturing/testing supply chain (DFX)
- ITAR Registered
- RoHS and WEEE compliant
- Paperless facility with full lot traceability

OnCore medical and scientific product portfolio

- Patient monitoring equipment
- Medical imaging systems
- Blood gas analyzers
- Bone density scanners
- Heart monitoring devices
- Clinical diagnostic systems
- X-ray equipment
- Brain wave monitoring devices
- Integrated diagnostic systems
- Vital signs monitoring
- Laboratory freezers
- Centrifuges
- Research chillers

From circuit boards to full product assemblies, OnCore applies the highest standards of quality and reliability to the manufacture of medical and scientific equipment.

OnCore medical/life sciences manufacturing resources

We focus the resources of our five North American facilities — and our engineering and manufacturing expertise — to each medical and scientific electronics project we undertake. Proprietary manufacturing and test methodologies have contributed to our reputation as a leading manufacturer in the medical and life sciences industries as well as others, partially listed below.

- Defense
- Gaming
- Industrial Telecom and RF
- Datacommunications

Contact OnCore Manufacturing today to discuss your product manufacturing needs. Find out how OnCore Manufacturing Services can deliver the highest quality and best business practices your projects deserve.
